# COFFEE

Coffee is a brewed beverage made from the roasted seeds, or “beans,” of the coffee plant. Once ripe, coffee berries are picked, processed, and dried. Dried coffee beans are roasted to varying degrees, depending on the desired flavour. Roasted beans are ground and brewed with near boiling water to produce coffee as a beverage.

## Coffee Bean Varieties:-

Two major categories of coffee beans.

- Arabica
- Robusta

Although there are several levels of roasting, they can be grouped into three main categories: light, medium, and dark.

## Roasting Types:-

- ✦ **Espresso:-** Shiny Black color with oily Surface. Significant amount of bitterness. Origin flavor is gone and the flavor of the roasting process comes out the most.
- ✦ **Medium Roasts:-** Medium Brown in Color. Slightly sweeter than Light Roasts. Balanced Flavor, aroma & Acidity.
- ✦ **Medium - Dark Roasts:-** Rich, darker color with some oil on the surface Bittersweet aftertaste. Flavor & Aroma emerge & acidity disappears completely.
- ✦ **Light Roasts:-** Light Brown in Color. No Oil on the surface. Origin of the beans are most distinct.
